Allergens: see ingredients in **bold**

Indications

HiPP Organic First Infant milk is a nutritionally complete, whey-based breastmilk substitute, suitable for babies from birth who are being combination fed or not being breastfed.

Contra-indications

- Not suitable for intravenous use
- Not suitable for cows' milk protein or fish allergy
- Not suitable for lactose intolerance
- Not suitable for vegetarians.

Preparation

All HiPP Organic products carry preparation instructions on the packaging.

The 90ml plastic bottles of sterilised first infant milk are designed for use in hospitals and for travelling, and should be used with a sterilised disposable screw-on teat. Before feeding, shake bottle well and heat to drinking temperature (37°C) by standing the bottle in warm water. Shake bottle again. Take off the lid and the foil and unwrap the ready to use teat; holding the teat ring, screw directly onto the bottle. Test the temperature of the milk by shaking a few drops onto the inside of your wrist before feeding. Feed immediately. Any leftover feed should be discarded at the end of the feed.

Pack format and product code

HiPP Organic first Infant milk is available in 90ml ready to feed, 200ml ready to feed, and powdered formats (see separate data cards for the 200ml ready to feed and powdered products).

Product code: HiPP Organic First Infant milk 90ml ready to feed – **GB2371-03 and GB2371-03F**

First infant milk Starter packs – 6 x 90ml bottles ready to feed milk and 6 x disposable sterilised latex free teats – **GB2371-03 KSP**

Storage

Store in a cool, dry place and at room temperature. Before use, unscrew the lid and check if the foil seal is still intact by gently squeezing the bottle, check best before date and shake well.

Important Notice: Breastfeeding is best for babies. It is recommended that infant formula is only used on the advice of a Doctor, midwife, health visitor, public health nurse, dietitian or pharmacist.
